

Cockpit Spray

Bardahl Cockpit Spray protects, penetrates and beautifies all vinyl, rubber, painted and plexiglass surfaces.

The problem

When sunshine acts on oxygen and auto exhaust to make ozone, it creates the number one killer of rubber, vinyl, plastic and leather. Ozone cracks and rots these materials, the sun's ultraviolet rays weaken and discolor them, and oxygen hardens them.

The working

Bardahl Cockpit Spray renews, revitalizes, and protects rubber, vinyl, plastic and leather. Its molecules form a thin, tough layer that blocks the cracking effect of ozone, the discoloring and weakening effects of ultraviolet, and the hardening effect of oxygen.

Bardahl Cockpit Spray freshens and restores the original colour of plastics. It sheds surfaces against moisture and dirt. It also cuts dust attraction by ending static electricity. The product has a pleasant odor which acts as an air refresher.

Use of **Bardahl Cockpit Spray** will extend the average life of polymer materials many times. It improves the appearance and protection of all kind of surfaces. The silicone in the product lubricates and will stop binding squeaking and sticking.

The product has numerous applications in cars and trucks, such as: dashboards, door coverings, consoles, plastic covers, vinyl top roofs, sun visors, rubber floor mats, but also all rubber, vinyl, plastic parts in camper, boat and any other recreational vehicle.

In and around the house or office it protects and beautifies all kind of material, furniture, instruments and other electrical components.

Directions for use

Remove heavy dirt and grease with a **Bardahl Allround Cleaner**. Spray on **Bardahl Cockpit Spray** and spread with a soft cloth. Let product penetrate a while and buff of excess. For maximum protection it is best to repeat treatment. Buffing between applications will remove surfaces excess, leaving a thin layer of product into the protected material.

Depending on the conditions under which the material treated has been used it is best to repeat the treatment after a couple of months.
