G-BASE SYNTHETIC TECHNOLOGY is innovative lubricants production technology uniting modern scientific achievements, unique formulations, advanced production and quality control.

G-Energy Synthetic Super Start 5W-30 is synthetic G-Base technology all-season engine oil with improved low-temperature performance. Designed for gasoline and diesel engines, compatible with modern after-treatment systems (DPF – Diesel Particulate Filter, TWC – Three-Way Catalyst). Product provides easy engine startup and additional protection in wide temperature range, including operation at low ambient temperatures.

Application

- Passenger cars, light off-road trucks, SUVs, vans and LCVs
- Wide range of naturally aspirated and turbocharged gasoline and diesel engines, requiring SAE 5W-30, ACEA C2/C3, API SP and lower tier engine oils.
- Vehicles operating in climate with big ambient temperatures variations.
- Can be used in Diesel Particulate Filter (DPF) and Three-Way Catalyst (TWC) equipped engines .

Advantages

Easy engine startup in any climatic conditions, including low ambient temperatures

Improved sludge control during engine warmup

Engine start-up wear minimization, including start-stop system operation

Smooth and silent engine operation during whole work cycle – from startup to shutdown

Reduced-SAPS additive technology provides compatibility with modern after-treatment systems (DPF – Diesel Particulate Filters, TWC –Three-Way Catalysts)
